CLOUD COMPUTING

- What is cloud computing?

- Why should I care?

- How does it help me?

CLOUD COMPUTING

What is cloud computing?

The use of computing resources (hardware and software) that are delivered as a service over a network (typically the Internet).

The name comes from the common use of a cloud-shaped symbol as an abstraction for the complex infrastructure it contains in system diagrams.

Cloud computing entrusts remote services with a user's data, software and computation.

CLOUD COMPUTING

Why should I care?

- Emerging as primary strategy

- Decreases hardware costs (storage/processor)

- Ability to "hold on" with old technology

- Virtually eliminates software costs

Cloud computing

CLOUD COMPUTING

How does it help me?

- Saves you time & money

- Provides access to information regardless of location/technology

- Storage

- Collaboration

- Accountability

CLOUD TOOLS: GOOGLE

Suite

- Calendar

- Tasks

- Docs

- Drive

- Gmail

KID ORANGE TECH

Lisa Olds

EARLY LEARNING TECHNOLOGY SOLUTIONS

Kid Orange Tech provides kid-friendly, 100% educational technology solutions to support classrooms and parents.

As technology plays an increasing role in children's everyday lives, it is important to ensure their experiences are safe and that their screen time has an educational purpose.

In the rapidly changing and ever expanding world of available technology resources, this can pose a challenge to educators and parents as they strive to find age-appropriate content and interactive hardware for early learners.

# EARLY LEARNING TECHNOLOGY SOLUTIONS

The most powerful use of technology for children is when it is used to connect educators and parents to easily communicate learning goals so that a parent can reinforce what is being taught in school.
