Choose your class....and Begin!

As a first year teacher you are required to take some BASIC Courses.

- > Child Abuse and Neglect
- > Essentials of Indoor/Outdoor Safety
- > Infectious Disease Control: Kick Those Germs to the Curb

Once those are completed, think about the times during the day that you struggle with in your work. Is it, transitions, classroom management, or creativity? Look for classes that will provide information and strategies to support you in the work you do! Hint: Classroom Management and Positive Guidance and/or Learning Environments

Experienced teachers (3-10 years experience)
What classes should you be taking?

What are your goals as you reflect on your teaching? Are you struggling with classroom behaviors that are different from when you first started teaching?

Consider classes in the following areas:

- > Cognitive Development
- > Communications and relationships
- > Curriculum
- > Observation and Assessment

Tenured Teachers (10 + years experience)

Congratulations! What a difference you have made to the children you have taught! You have learned a lot along the way. Take a moment to think about the next ten years. What do you want to know more about? How can you GROW as an Early Childhood Professional? How can you Mentor others?

Explore classes in the following areas to help you become the expert in your school:

- > Leadership and Advocacy
- > Working with Families

Consider some refresher courses in the areas of:

- > Child Growth and Development
- > Cognitive Development
- > Language and Literacy
